

PIG® Oil-Only Absorbent Boom

#BOM304 - 8" x 10' • Absorbs up to 12 gal. per boom • 4 booms

Control oil spills on land or water with the field-proven performance of PIG Booms.

- Field-proven performance works in all conditions to absorb oil spills on land or water
- Floats to confine and soak up spills on water; hugs ground for land-based spills
- Tough outer mesh is UV resistant for long-term outdoor use without degradation; lets fluids easily pass through to filler material
- Rope running along length of boom withstands up to 400-lb. loads, adding strength for deployment and retrieval
- Spunbond polypropylene skin is UV resistant up to 12 months; meets NFPA 99 standards for static decay
- Booms float at surface for easy retrieval, even when saturated
- Absorbs and retains oils and oil-based liquids - including lubricants and fuels - without taking in a drop of water
- Strong, zinc-plated carbon steel attachment clips and rings allow you to link booms together for greater length
- Bright white color makes booms easier to see in outdoor environments and clearly shows saturation level
- Can be incinerated after use to reduce waste or for fuels blending

BOM304 Specifications

Color:	White
Dimensions:	ext. dia. 8" x 10' L
Fluids Absorbed:	Oil-based Liquids But Not Water
Absorbency:	Up to 48 gal. per bag
Absorbency per:	Up to 12 gal. per boom
Sold as:	4 booms per bag
Weight:	45.5 lbs.
National Stock Number (NSN):	7930-01-436-8326
# per Pallet:	8
Composition:	Outer Mesh Skin - Polyester Inner Skin - Polypropylene Pulp Filler - Polypropylene Clip/Ring - Zinc Plated Carbon Steel
UNSPSC:	47131907

BOM304 Metric Equivalent

Dimensions:	ext. dia. 20.3cm x 3m L
Absorbency:	Up to 181.7 L per bag
Absorbency per:	Up to 45.4 L per boom
Weight:	20.6 kg

Technical Information

Warnings & Restrictions:

There are no known warnings and restrictions for this product.

Certifications, Approvals and Ratings:

NFPA 99

Regulations and Compliance:

40 CFR 122.26 - When applying for a National Pollutant Discharge Elimination System (NPDES) permit, facilities must have a plan in place that describes actions, procedures, control techniques, management practices and equipment available to prevent illegal discharge of pollutants into waterways.

40 CFR 112.7 - SPCC planning requirements state that facilities subject to these regulations must have written plans in place discussing the products, countermeasures and procedures that are in place, or will be taken by the facility to prevent discharge of oil into waters of the United States.
